Universal 911 Dialing- Second Transition Report

Please read instructions before completing

**Section 1
Carrier Identification Information**

Parent Company Name

Service Provider Name

RSA 1 Limited Partnership d/b/a Cellular 29 Plus

Company Address, City, State, Zip

404 Howland
Emerson, Iowa 51533

Service Provider Type ☒ Wireless ☐ Wireline

Name(s) of Wireless License Holder(s)

RSA 1 Limited Partnership d/b/a Cellular 29 Plus

Contact Name

Robert Guerrero, Operations Manager, RSA 1 Limited Partnership d/b/a Cellular 29 Plus

Michael K. Kurtis, Esquire, Kurtis & Associates, P.C.

Contact Tel #

RSA 1 Limited Partnership d/b/a Cellular 29 Plus - (712) 824-7798

Kurtis & Associates, P.C. - (202) 328-4500

Fax #

RSA 1 Limited Partnership d/b/a Cellular 29 Plus - (712) 824-2345

Kurtis & Associates, P.C. - (202) 328-1231

E-mail Address

RSA 1 Limited Partnership d/b/a Cellular 29 Plus - robertg@I35-swt.com

Kurtis & Associates, P.C. - mkurtis@kurtispc.com

Section 2**Local Area 911 Implementation**

List all individual local areas covered by this report (e.g., Lee County, Virginia):

Atchison County, Missouri (FIPS Code 29005)

Worth County, Missouri (FIPS Code 29227)

For each area listed above, identify the emergency response point to which calls are now being routed.

Basic 911 calls that are captured by RSA 1 Limited Partnership d/b/a Cellular 29 Plus' ("Cellular 29") cell sites are routed, through a Qwest selective router, to the appropriate PSAP as determined by the State of Iowa 911 Board, Iowa Emergency Management Division. Intrado completed the routing to specific county PSAPs for Cellular 29 on September 13, 2002 by implementing a CellTrace Plus procedure. This procedure uses Intrado's Service Control Point (SCP) to deliver the caller's cellular phone number and the cell site and sector number to the appropriate PSAP. Prior to that date, and with the acknowledgment of the State of Iowa 911 Board, all basic 911 calls captured by Cellular 29, were routed directly to the Iowa State Patrol, Atlantic PSAP. Cellular 29 provides CMRS wireless service in the Iowa 1-Mills RSA (Station KNKN649) (CMA412B), but because of the reasons listed below, is filing this instant report.

Atchison County, Missouri -

One of Cellular 29's cell sites (Blanchard), while designed to provide service within Iowa, is physically co-located on a tower with Northwest Missouri Cellular Limited Partnership ("NWMO") within Atchison County, Missouri. NWMO is the licensed service provider in Missouri 1-Atchison RSA. Even though the Cellular 29 antenna is highly directional to the north, because the site is located just south of the Iowa-Missouri state line a cellular unit in a de minimis portion of Atchison County could lock onto the Cellular 29 Blanchard cell. The mobile calls captured on the Cellular 29 Blanchard cell are routed to the Page County Sheriff's Office, the PSAP for Page County, Iowa, as coordinated through Intrado and Qwest's selective router. The Missouri 911 Administrative Office and the Page County, Iowa PSAP are aware of this situation. The Page County PSAP has noted that it will accept all basic 911 calls for the Cellular 29 Blanchard cell site and coordinate the dispatch of the appropriate emergency personnel in Missouri by forwarding the calls to ACCentral, the only PSAP in Atchison County, Missouri.

Worth County, Missouri -

No PSAP exists in Worth County. Instead, the Missouri 911 Administrative Office has designated the Gentry County Emergency Dispatch, the PSAP for Gentry County, as the appropriate PSAP to receive wireless basic 911 calls made in Worth County, Missouri. Worth County lies in the state of Missouri, beyond Cellular 29's licensed service area, and Cellular 29 does not have any cellular towers or cell sites located in the county itself. However, because of the limited coverage available from the licensed carriers within that market, a minimal amount of mobile capture within Worth County occurs as a result of a useable level of signal extending into that county from Cellular 29's Bedford tower in Taylor County, Iowa (which is to the northwest of Worth County). The mobile calls captured on the Cellular 29 Bedford tower are routed to the Taylor County Sheriff's Office, the PSAP for Taylor County, Iowa, as coordinated through Intrado and Qwest's selective router. The Missouri 911 Administrative Office and the Taylor County, Iowa PSAP are aware of this situation. With the permission of the Missouri 911 Administrative Office, the Taylor County PSAP has noted that rather than forwarding calls to the Gentry County PSAP for eventual routing back to the Worth County Sheriff's Office, it will accept all basic 911 calls for the Cellular 29 Bedford tower and coordinate the dispatch of the appropriate emergency personnel in Missouri by either forwarding the calls directly to the Worth County Sheriff's Office, or by communicating with the appropriate local emergency authority in Worth County on behalf of the callers.

Section 3**Certification - To be signed by an authorized representative of the reporting entity**

I certify that I am an authorized representative of the above-named reporting entity, that I have examined the foregoing report and to the best of my knowledge, information and belief, all statements of fact contained in this form are true and that the reporting entity has completed the steps necessary to properly route 911 emergency calls in the localities covered by the report as of September 11, 2002.
